Probiotics Prebiotics in Pediatrics

Dear Friends and Colleagues,

The COVID-19 pandemic has challenged our model of face-to-face meetings as physical distancing measurements are needed to prevent the spread of this terrible disease. To adapt to the current situation, we have decided to take on the challenge to transform our **6th International Congress of Prebiotics, Probiotics in Pediatrics** into a fully virtual congress. This will give our community the possibility to access the most updated basic and clinical research on prebiotics and probiotics for the developing human while protecting the health, safety, and well-being of all conference participants.

In this time of uncertainty, we look forward to transform this crisis into a new opportunity, one that will open a wide and ongoing discussion in welcoming new technologies and finding new ways to advance the scientific divulgation in a safe, economic and outstanding manner.

The virtual Congress will take place November 2th to 6th, 2020

All virtual conference materials will be available on demand for all registered participants for 1 year on our website.

Registered participants will be eligible to receive the credits attributed to the virtual congress, and accepted abstracts will be published in our website allowing for virtual discussions.

Further registration and scheduling details for delegates, speakers and industry partners will be announced in due course

We thank you in advance for your support in making the PREPROPED 2020 Virtual Congress a success!

Kindest Regards

Pedro Gutierrez-Castrellon MD, PhD
